

Have you started
noticing changes
in your memory or
ability to think clearly?

A Clinical Research Study for Early Symptomatic Alzheimer's Disease

The persons depicted in this advertisement are models and the images are being used for illustrative purposes only.

If you are experiencing memory loss or challenges performing complex tasks, you may qualify for a clinical research study for early symptomatic Alzheimer's disease.

In order to qualify you must:

- Be 60 to 85 years old
- Have memory loss that has gotten worse over time
- Have a study partner who knows you and is willing to attend visits with you throughout the study

**The study partner must be able to speak about the participant's day to day routines and any changes with the research staff throughout the study.*

All study related care will be provided at no cost to you.

Health insurance is not required.

Ask your doctor about the **TRAILBLAZER-ALZ 2** Clinical Research Study today and visit trailblazer2study.com or call

**When it comes to questions about your health,
you've always sought out the answers. Why stop now?**
